

CTP environnement group is turning 100 and opening a new chapter in its history

In 2026, CTP environnement group celebrates a century of expertise, commitment and innovation in the service of industry and the environment.

With expertise in industrial dry cleaning and the treatment of industrial water and effluents using mobile units, CTP environnement supports manufacturers in improving their performance, maintaining their equipment and reducing their environmental impact.

To mark the event, the company invited its staff, clients and partners to an anniversary celebration held on **9 July 2026** at the LA MAISON restaurant (France - 69), a historical venue that is iconic within Lyon's nightlife scene.

This event provided an opportunity to celebrate how far the company has come and to thank everyone – whether present or not – who has contributed to the development of CTP environnement throughout its history.

An evening filled with emotion & the transfer of legacy

The centenary celebrations were also the occasion for the retirement announcement of **Philippe Barre**, Chairman of CTP environnement.

After supporting the company's growth and expansion for 40 years, Philippe Barre officially stepped down from his position on **31 July 2026**.

Lionel Mondelin, Managing Director, has therefore officially taken up his new role as Chairman and Chief Executive Officer.

This handover marks another significant milestone in the history of CTP environnement. It is carried out in a spirit of continuity, trust and knowledge transfer, with a new dynamic for the company.

A centenary company looking to the future

With over 100 years' expertise serving the environment and industry, CTP environnement is entering a new phase of its development in France and internationally.

The company aims to strengthen its capacity for innovation, accelerate its transformation and enter new high-potential markets.

Driven by strong values, a recognised corporate culture and an ambitious strategic plan, the group set itself a target of sustainable growth, with the aim of doubling its turnover to reach 100 million euros by 2030.

The group will continue to develop ever more effective, sustainable and innovative solutions to support its clients in meeting the environmental, industrial and regulatory challenges of the future.

Supported by the involvement of its staff, the continued trust of its clients and the strength of its partnerships, CTP Environnement is embracing this new chapter in its history with ambition, enthusiasm and determination, remaining true to its mission: to build sustainable solutions that promote environmental and industrial performance.

About the organisation of the event

The agencies selected impressed us with their concept and their commitment to CSR:

BISONS Agency : specialising in digital technology and building illumination, this local agency carries out a comprehensive carbon assessment of each event and provides a roadmap for moving towards more responsible event organisation.

ENGAGEVENT Agency : the agency supports French and international organisations that share its values. We are therefore delighted to know that 5 per cent of its fees will be donated to the charity 'Semeurs de Forêts', thereby turning our event into an active contribution to the creation and protection of forests and areas of biodiversity in France.

About CTP environnement group

Founded in 1926, CTP environnement is the leading provider in the field of technical industrial cleaning (chemical treatment of heat exchangers). The CTP Group – with 250 employees, five branches in France, a Nuclear Division and six overseas offices (in Singapore, Brazil, Canada, Portugal, the United States and the United Kingdom) – has also become a specialist in effluent treatment using mobile units since 2007, operating across numerous sectors in more than 45 countries.
